Smart Flow

Focus on Post press

Today most plants are still running with a traditional workflow. Each division; pre-press, press and post-press are working independent with their own knowledge and needs.

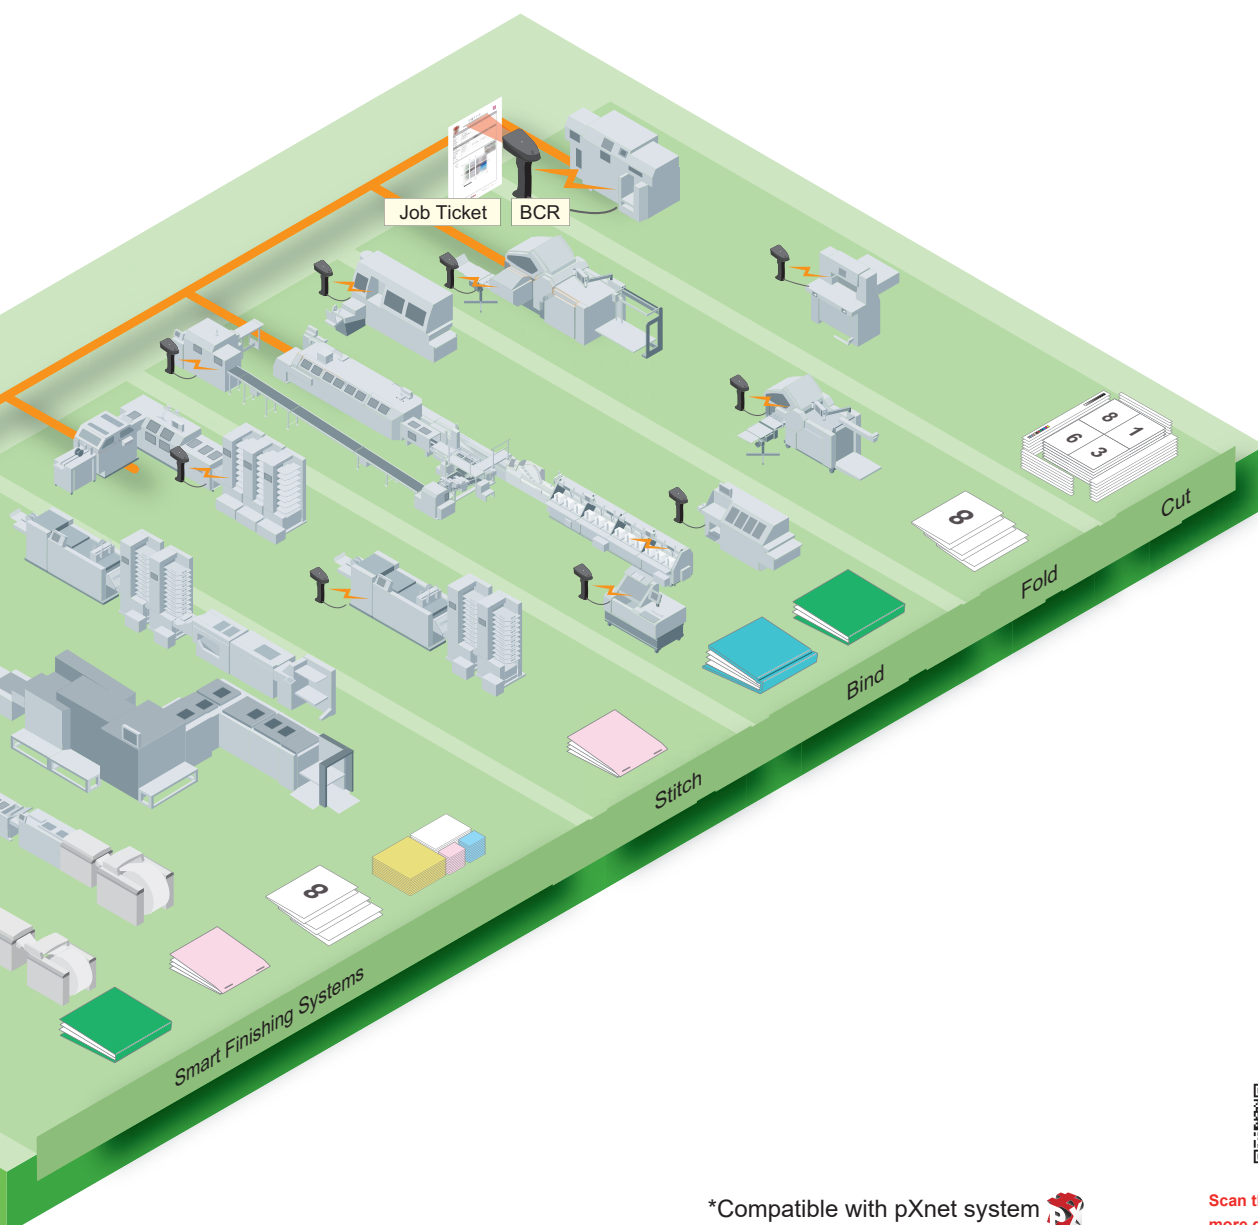

However, when you focus is on post-press as the first consideration and impositions are based on the finishing capabilities, it can reduce steps and waste for more efficient production and profitability.

Manage your bindery with JDF enabled control system.

The Horizon pXnet Bindery Control System is used as a central control point to schedule work, send job data to each finisher, monitor status of finishers and collect production statistics from finishers in real-time. pXnet brings efficiency and value in high-mix/low-volume production environments where frequent job changeovers are needed.

The pXnet system can also be interfaced with an existing workflow for automated JDF set-up.

*Compatible with pXnet system 

Scan this barcode for more detail information.

Digital Finishing

Smart Binding System

9-Clamp Perfect Binder

SB-09V / SB-09VF

Smart Binding System for continuous-feed digital print, producing short-run, variable books of different size and thickness from a roll with no manual touch points. Rolls are unwind, cut and folded to signatures in the AF-566F Folder. The signatures are stacked and glued into book blocks by BBS-40 and presented to the SB-09V nine-clamp Perfect Binder. Bound books are delivered via conveyor for three-knife trimming on the HT-1000V variable trimmer.

Book Block Stacker

BBS-40 / BBS-40L

The signatures are temporally bound by spot-gluing and transported to the next binding process. The optional tracking system verifies the sequence of sheets before gluing. This process insures the page order and provides a higher level of quality control.

Book Block Feeder

BBF-SB

Sewn book block or pre-glued book blocks can be fed into the binder efficiently. BBF-SB increases productivity by improving production efficiency and minimizing labor.

Smart Stitching System

AS-30S+CF-30S+ACF-30S+SPF-30S+HTS-30S

In-line Saddle-Stitcher

StitchLiner6000 Digital

The Stitchliner6000-Digital features uniquely designed sheet transportation technology and rigid machine construction achieves consistent high speed production at 6,000 booklets per hour. Cover feeder can be used as sheet inserter as option so that additional offset printed or color printed sheet can be inserted in any section of the booklet.

Smart Folding System

In-line Computerized Buckle Folder

AFV-566DF / 564DF

The AFV-566DF is a fully automated folder which can be configured in-line with an unwinder and cutter for digital roll production. This system features dynamic folding to change fold pattern on-the-fly for variable signatures to minimize blank pages at the end of a book.

AFV-566DF+TV-564F+DIFV-56

Smart Sheet Processing System

Smart Sheet Processing System

SmartStacker

The SmartStacker can process a B2 (20" x 29") sheet to finished format size efficiently.

The SmartStacker can be connected directly to the HP Indigo 10000 Digital Press or operated as a near-line system with sheet feeder.

Near-Line Solution

Sheet Cutter and Creaser

SmartSlitter

The SmartSlitter is an all-in-one smart sheet processing system that can slit, gutter cut, edge trim, cross-cut, perforate, and crease all in one pass. Print mark registration adjusts for digital print image shift from sheet-to-sheet. Simple operation and easy job set-up via barcode. Ideal for greeting cards, table tents, invitations, and business cards. Skip perf feature can produce Tand L-perforations for tickets, coupons, and reply cards.

SMSL-100

CABS

17-Clamp Computer Aided Binding System

CABS6000 

9-Clamp Computer Aided Binding System

CABS4000S / CABS4000V 

9-Clamp Perfect Binder

SB-09S / SB-09SF 

The SB-09S/SF provides maximum productivity for short to medium run length at up to 4,000 books per hour. Major system setups are performed automatically and book size or book thickness changeovers are completed within 3 minutes so that the SB-09S/SF provides quick, easy makeready for frequent job changes. Revolutionary seesaw style feed plate for increased space efficiency.

17-Clamp Perfect Binder

SB-17 

The SB-17 features highly accurate automated set-up with simple and easy operation. Both EVA hotmelt and PUR hotmelt can be used by using the interchangeable melt tanks. EVA tank provides exceptional glue application, even at high speed, thanks to 3 application rollers and a scrape roller on the EVA glue tank. Two milling stations provide a versatile range of spine milling preparations.

6 Hopper Modular Gathering System

MG-600

MG-600 can be extended up to 6 gathering units (36 stations can be combined). Intuitive operation through intelligent touchscreen control can give very easy operation. Image checker (Option IC-MG600) detect sheets that have been improperly positioned or misprinted. The ST-600 inline stacker allows gathering to be performed offline from the binder.

MG-600

Three-knife Trimmer

HT-110

The HT-110 features automated setup for different book sizes and precision cutting accuracy. Job changeovers are performed simply and quickly through the LCD touchscreen. Unlike other three-knife trimming systems, there are very few replacement parts when changing over the HT-110.

HT-110

7-Clamp Perfect Binder

SB-07

The 7-clamp system binder produces exceptional high quality binding with tight and square finish spine. Simple setup and easy operation speed up the changeover to adopt short-run binding job.

SB-07+LD-09S+AC-08+PM-20II

Tipping Collator

HAL-4

The HAL-4 provides high quality tipping of business reply cards or single sheets in a compact gathering unit. An optional CCD camera can be attached in the hopper to detect incorrectly loaded signatures.

HAL-4

Folders

Cross Folder

AFC-746F B1 size

The AFC-746F features Intelligent automation. All sections, including the buckle plates, roller gaps, and suction heads, can be adjusted by inputting the paper size and fold pattern through the 10.4 inch large color touchscreen. It takes only a couple of minutes to finish the changeover from 16-page B1 format signatures to 16-page B2 format signatures.

AFC-746F with Pallet Feeder+PSX-56

Pallet Feeder

The Pallet Feeder provides easier sheet handling for operator. The stacked pallet from the press can be attached at the feeding section of the folder.

Available Machines

AFC-746F, AFC-746S/746D, AFC-744A/744S

Cross Folder

AFC-746S / AFC-746D B1 size

The AFC-746S/746D is equipped with 6 buckles and 2 cross knives. The 10.4 inch large color touchscreen provides for user-friendly operation. Combination with 6 parallel buckles, 1st cross knife, 1 buckle under knife, and 2nd cross knife performs wide variety fold-ings. AFC-746D is available as a GS certified model.

AFC-746S with Round Pile Feeder+MKU-CU+MKU-54

Round Pile Feeder

Top loading round pile feeder archives continuous operation for longer run production.

Available Machines

AFC-746F, AFC-746S/746D, AFC-744A/744S

Cross Folder

AFC-744A / AFC-744S B1 size

The AFC-744A/744S is a 4KTTL folder. The AFC-744A/744S can setup 14 fold patterns, including 16-page cross fold and 8-page cross fold, by selecting the desired fold pattern and inputting the sheet size on the 10.4 inch color touchscreen. All settings can be done through the large and interactive icon-based touchscreen for user-friendly operation and quick changeover. The AFC-744S has additional automation including knife stopper fine adjustment and buckle under knife.

AFC-744A with Flat Pile Feeder

Flat Pile Feeder

Maximum Pile Height is 750 mm / 29.5".

Available Machines

AFC-746F, AFC-746S/746D, AFC-744A/744S

Cross Folder

AF-762KL / AF-762KLL B1 size

The AF-762KLL has 2 parallel fold buckles and 3 cross knives. 8-page, 16-page, and 32-page section folding are processed with high precision.

AF-762KLL with Flat Pile Feeder

Round Pile Feeder

The Round Pile Feeder can feed a wide range of sheets including prefolded, preperforated or prepunched sheets.

Available Machines

AF-762KL/KLL

Flat Pile Feeder

The feed table automatically descends for sheet loading to maintain proper distance between the top of piled sheets and the feed rotor.

Available Machines

AF-762KL/KLL

Cross Folder

AFC-566F B2 size

The AFC-566F is fully automated folding machine equipped with 6 buckles, 1 cross knife, and 2 buckles under knife. All necessary settings including roller gap adjustment can be performed through the 10.4 inch color touchscreen display.

AFC-566F

Cross Folder

AFC-566AKT B2 size

The AFC-566AKT computer-controlled folder combines superior feeding and registration with color touchscreen control. An operator can select from 17 pre-set folds or set up to 200 custom folds, all with touchscreen ease. The AFC-566AKT can handle a wide range of papers at belt speeds up to 230 m (754 ft) per minute.

AFC-566AKT+PST-44

Cross Folder

AFC-564AKT B2 size

The AFC-564AKT computer-controlled folder combines superior feeding and registration with color touchscreen control. An operator can select from 14 pre-set folds or set up to 200 custom folds, all with touchscreen ease. The AFC-564AKT can handle a wide range of papers at belt speeds up to 230 m (754 ft) per minute.

Cross Folder

AFC-492 with Safety Cover B3 size

The AFC-492 is a heavy-duty floor model folder with 2-buckle+1-cross knife folder.

Buckle Folder

AFV-566F/A, AFV-564F/A

TV-566F/A, TV-564F/A

The AFV-566F/TV-566F is a fully automated buckle /buckle folder. This solution features faster changeover, automatic scoring navigation, an air controlled register table, easier sheet loading, and reduced noise for comfortable operation.

AFV-566F+TV-564F+PST-44

Buckle Folder

AF-406T6F / AF-406T6S

The AF-406T6F / AF-406T6S is an automated buckle folder. The AF-406T6F / AF-406T6S features unique modular system. 6 buckles on 1st station and 6 buckles on 2nd station can be combined. Even concertina fold and DL fold can be performed easily.

AF-406F+T-406F+SCV-406

Suction Paper Folder

EF-354 (SR)

Suction Paper Folder

EF-35 (SR)

The EF-35 has 2 buckles and the EF-354 has 4 buckles. The compact design incorporates a top-load/bottom-feed system, self-compensating combination fold rollers, and a space-efficient variable speed delivery.

SR: Steel & Rubber Folding Roller Version.

EF-35

Creaser and Folder

CRF-362

The CRF-362 creaser folder has been designed to handle the unique requirements of creasing and folding digital color output across a wide range of light and heavy weight stocks, coated or uncoated. Creasing and folding can be done in one pass for easy and accurate processing of a variety of applications.

CRF-362

Paper Folder

PF-40L

The PF-40L is equipped with 2 buckles to meet a variety of folds. Each section sets-up automatically by simply select sheet size and fold pattern. Fine tune adjustment can be performed at 0.1 mm for accurate folding. Uniquely designed suction rotor feeding is employed to meet high speed production up to 390 sheets per minute, wide range of paper stock can be fed with ease.

PF-40L+MT-40L

Options

Round Pile Feeder Unit

RFU-54

The RFU-54 can be attached to the folder without removing the flat pile feeding table.

Friction Collator

SAC-150

The SAC-150 is a 15-bin friction-feed collator. The collating system can be expanded up to 4 towers for a maximum of 60 bins. And a computer-assisted programming system provides three highly productive collating modes (Double Cycle, Dual Cover Feed, and Combined Mode).

SAC-150 (60 bins)+ST-60

Suction Collator

TAC-8

The TAC-8 is an 8-bin air-suction collator suitable for collating large formats (A2 / 19" x 25") for applications such as calendars. Sustained performance and reliability will improve your collating productivity.

TAC-8 (16 bins)

Criss-Cross Receiving Tray

SW-12 / SW-20

The Criss-Cross Receiving Tray swings 90 degrees at each collating interval, clearly separating the collated sets.

Available Machines

VAC-1000, VAC-600H, SAC-150, HAC-120

Off-set Stacker

ST-20 / ST-20R

The Off-set Stacker Receiving Tray shifts each collated set laterally, separating the collated sets.

Available Machines

VAC-1000, VAC-600H, SAC-150, HAC-120

Paper Jogger

PJ-75 / PJ-77 / PJ-77R

Driven by an independent motor, the paper jogger vibrates collated sheets into perfect alignment; even NCR paper can be well jogged.

Available Machines

VAC-1000, VAC-600H, SAC-150, HAC-120

Sub Accumulator

SA-40

The SA-40 sub accumulator temporarily accumulates the sheets delivered from the collator and stabilizes the sheet jog for the stitcher for quality bookletmaking. Also the SA-40 improves the sheet jog for the ST-40 bypass stacker.

Available Machines

VAC-1000, VAC-600H, SPF-200 series, StitchLiner5500

Bypass Conveyor

BC-20

The BC-20 is available for SPF-20 and StitchLiner5500 connection. Switching over from bookletmaking to stacking with CCR / CCR-DX or PJ-75 / PJ-77 without configuration change.

Available Machines

VAC-1000, VAC-600H, SPF-200 series, StitchLiner5500

BC-20+CCR-DX

Tandem Stacker

ST-60

The ST-60 is an off-set receiving stacker with tandem pallets for high-speed collation. The tandem stacker and error reject function provide an absolute minimum of system stops.

Available Machines

VAC-1000, VAC-600H, SAC-150

Bypass Stacker

ST-40

The ST-40 bypass stacker can be operated on-line with SPF-20, SPF-200A, and StitchLiner5500 bookletmakers. Two different jobs (bookletmaking or stacking) can be chosen by a switch on the ST-40.

Variable Trimmer

HT-1000V

The HT-1000V Variable Three-knife Trimmer for true on demand book production of variable sizes. The trimmer operates in-line with Horizon perfect binders or off-line to deliver a wide range of input and output sizes for completely variable production. Setup and variable trimming are achieved automatically by reading a barcode printed on the cover sheet of each book at the entrance of the trimmer, with no operator input required. The system trims up to 1,000 books of variable thickness and format size per hour and will accept a broad range of input sizes and deliver trimmed books.

HT-1000V

Three-knife Trimmer

HT-80

The HT-80 three-knife trimmer features automated setup so that most trimmer sections can be set up automatically by inputting the untrimmed size and finished size into the intuitive color touchscreen. System can be in-line with BQ-470 perfect binder for efficient book production.

HT-80+HR-80

One Knife Three-side Trimmer

HT-30C

The HT-30C is the one knife three-side trimmer for books-on-demand. The HT-30C features automated job setups and changeover to enable efficient just-in-time book production. The HT-30C can be connected to the Horizon perfect binder to form a true books-on-demand system.

HT-30C

Programmable Hydraulic Cutter

APC-610

The APC-610 provides highly accurate cutting, durability, and simple operation. No special skills are required to operate the APC-610 with its user-friendly touchscreen display and conveniently positioned, simple-to-use controls.

APC-610

Paper Cutter

PC-640 with Safety Cover

The PC-640 electric cutter is suitable for handling small volume jobs at in-plants or copy shops.

Rotary Die-cut System

RD-4055

The RD-4055 is Rotary Die-Cutter designed to meet the growing demand for short run product. Die-cut, Crease, Perforation, Slit, Hole punch and round corner in various substrates up to 0.5 mm / 0.019" (only for die cutting) thickness for digital and offset printed sheets.

RD-4055+FFU-4055

Stacker

ST-4055 for RD-4055

Optional ST-4055 stacks even thin sheets or delicate shaped products accurately by connecting to the RD-4055.

The transport belt vacuums the top surface of the sheet so that the cut product and wast are not separated while being transported.

ST-4055+RD-4055+FFU-4055

Rotary Die-cut System

RD-3346

The RD-3346 is Rotary Die-Cutter designed to meet the growing demand for short run product. The system is suitable for small applications such as business cards and product tags. Flexible substrates can be run through for die cutting and kiss cutting for the sheet thicknesses up to 0.35 mm / 0.013".

RD-3346

Stacker

ST-3346 for RD-3346

Optional ST-3346 stacks even thin sheets or delicate shaped products accurately by connecting to the RD-3346.

Maximum stack capacity: 70 mm or 2.76".

* Connect the ST-3346 next to the SPC-3346 separator.

Auto Creaser

CRA-36

Suitable for creasing covers, restaurant menus, shop cards, invitation cards and laminated sheets. The impact creaser avoids cracking on digitally-printed applications. High quality creasing helps to prepare high quality perfect bound book covers. Spine, hinge and flap creases can be properly produced by selecting up or down creasing.

CRA-36

Perforator

VP-66

The VP-66 is a straight perforator capable of handling larger sheets up to 655 x 655 mm / 25.7" x 25.7".

VP-66

Perforator

VP-53

The VP-53 is a straight perforator capable of perforating up to 10,000 sheets per hour. Optional scoring and slitting blade are available.

VP-53

Skip Perforation Unit

JM-66 for VP-66 / JM-53 for VP-53

Start and finish perforation points can be setup in 1 mm unit for best perforating accuracy. Up to 4 skip perforation unit can be attached.

Operation Console

Perforation Unit

Spine Taper

GMS-7

The GMS-7 spine taping machine features bottom feed, sensor-controlled spine length gauging, and simple and quick makeready.

GMS-7

Paper Jogger

PJ-100

The PJ-100 air-assist paper jogger features a tilt-away jogging head, allowing you to set the system in either the vertical or horizontal position, depending on size and type of sheets.

Tabletop Folder

Paper Folder

PF-P280

The PF-P280 folder is designed to do one thing really well: produce single-folds on paper sizes up to A3 / 11" x 17".

PF-P280

Paper Folder

PF-P3100

The PF-P3100 is the ideal folder for office environments, featuring a production speed up to 240 sheets per minute and quiet operation. Six standard fold formats are offered including letter, accordion, gate, 4-page, 6-page, and 8-page folds.

PF-P3100

Paper Folder

PF-P3200

The PF-P3200 folder is an automated set up folder. The PF-P3200 sets the fold pattern automatically at the simple touch of a button and folds at speeds up to 240 sheets per minute.

PF-P3200

Automated Air Suction Fed Paper Folder

PF-P330

The PF-P330 folder employs Horizon's unique air rotor feeding for maximum feeding capability. Even color-printed sheets or coated papers can be folded. The PF-P330 provides simple set-up and fast, efficient production.

PF-P330

Tabletop Folder

PF-39

The PF-39 is heavy-duty tabletop friction feed folder with two buckles, capable of folding from 4 pages to gate fold.

PF-39

Tabletop Collator

Tabletop Collator
QC-S1000

The QC-S1000 is an entry level tabletop collator with 10 bins. Simple touch screen operation allows an operator to collate hundreds of sets in just minutes.

QC-S1000 + PS-P610

Tabletop Collator
QC-S30

The QC-S30 is an entry level tabletop collator. Simple push button operation allows an operator to collate hundreds of sets in just minutes.

QC-S30+QC-S30F (20 bins)+3 x MT-100

Punch Staple Unit
PS-P610

The PS-P610 optional stapling and punching unit can be combined with QC-S30 and QC-S300 and QC-S1200 collators. Corner staple, side staple, and punch(option) can be produced.

Available Machines
QC-S30, QC-S1000, QC-S1200

Tabletop Collator
QC-S1200

The QC-S1200 is an entry level tabletop collator with 12 bins. Simple touch screen operation allows an operator to collate hundreds of sets in just minutes.

Tabletop Bookletmaker

Bookletmaker

SPF-P9+FC-P9

The SPF-P9/FC-P9 in-line bookletmaking system features simple set-up and changeover. With the push of a button, you can select four different finishing styles. The SPF-P9/FC-P9 bookletmaker can be connected with both QC-S30, QC-S1000 and QC-S1200 tabletop collators.

QC-S1000 + QC-S1000F (20 bins) + SPF-P9 + FC-P9

Bookletmaker

SPF-8

The SPF-8 is a stapling and folding machine capable of folding, top and corner-stapling. The SPF-8 produces professional quality finished booklets.

SPF-8

Tabletop Binder

Tabletop Perfect Binder

BQ-P60

The BQ-P60 can produce perfect binds and spine taped books at a rate of up to 180 books per hour, and is ideal for users that have divergent, low-volume binding demands. This compact, productive binder is the perfect option for many office and print environments.

BQ-P60

Tabletop Paper Cutter

Tabletop Paper Cutter

PC-P430

The PC-P430 tabletop electrical powered cutter has a cutting width of 434 mm / 17.08". Maximum cutting height is 23 mm / 0.9".
