・Service launched with Web API functionality

# iCE LiNK Keeps Evolving!
Introducing the Latest Features

CSV/XML Job Feature
Job registration and management is now possible with CSV or XML files, perfect for MIS environments that aren't JDF compatible.

Additionally, automated setup of Horizon finishing machines can be accomplished by utilizing Ultimate Bindery and Job Memory functions.

Printer Dashboard Feature
All-in-One Job Management
Manage printer jobs and track output results together with finishing and postpress operations.

Seamless Integration with MIS
Works perfectly with the CSV/XML Job Feature for end-to-end workflow control.
