

HORIZON SMART FACTORY 2024

LIGHTS OUT

TAKE AUTOMATION TO THE NEXT LEVEL

5 years have passed since we held our first Think Smart Factory event in Kyoto, Japan, and with each year the need to automate becomes more and more dire. **It's time to take things to the next level.**

Horizon Smart Factory 2024 will push the boundaries of automation achieving completely autonomous printing, finishing, packaging, and shipping with cutting edge technology like AGV, robotics, and AI.

Seamless integration of printers, finishing equipment, and workflow systems will allow for the monitoring of each job's production status and progress. This new level of automation gives operators the opportunity to shift from repetitive, labor-intensive tasks to more fulfilling work while achieving a good work-life balance.

Come experience the future at Horizon Innovation Park, Japan, where we'll take factory automation to the next level and make lights-out print finishing a reality.
