# TWO TYPES OF TABLE-TOP COLLATORS.

Compact yet high performance collators for your efficiency.

## QC-S30 TABLE-TOP COLLATORS - 10 BINS

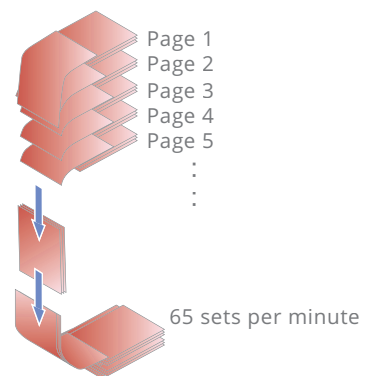

The QC-S30 entry level table-top collator features simple push button operation which allows an operator to collate hundreds of sets in just minutes.

### USER-FRIENDLY OPERATION

Three basic operation buttons, Check, Start and Stop, are located under the display panel for simple and easy operation.

### COLLATING FLOW

### BIN PILE HEIGHT

Capacity: up to 28 mm (1.10")

### DEEP RECEIVING TRAY

Capacity: up to 75 mm (2.9")

QC-S30 + MT-100

### HIGH SPEED PRODUCTION - 65 SETS PER MINUTE

Maximum production speed is 65 sets per minute (A4 / 8.5" x 11" LEF, Offset stack).

Offset Stacking

### QUICK RECOVERY

The machine stops automatically if the feeding errors (double feed, mis-feed, sheet jam) are detected. The error indication on the monitor screen assists the quick recovery.

### STABLE FEEDING

The large-diameter feed rollers enable the collator to handle a wide variety of sheets. The double feed stop pad and feed bins can be switched between high and low pressure settings for stable feeding.

### PRESET STOP

This function is useful for collating a pre-determined number of sets. The collating system stops after a preset number of sets have been collated.

## QC-S1200 TABLE-TOP COLLATORS - 12 BINS

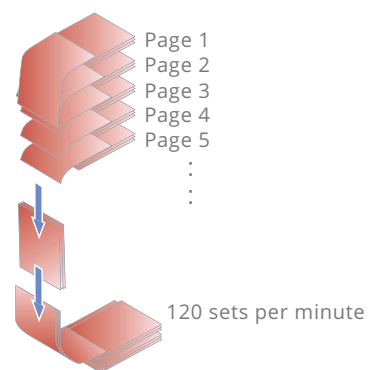

The QC-S1200 is an advanced table-top collator featuring high speed and high volume production. Newly equipped color LCD touch screen provides the intuitive operation.

### INTUITIVE OPERATION WITH COLOR LCD TOUCHSCREEN

The QC-S1200 is equipped with a 5.7 inch color LCD touchscreen. Operation and program settings can be done through the touchscreen.

### COLLATING FLOW

### BIN PILE HEIGHT

Capacity: up to 30 mm (1.18")

### DEEP RECEIVING TRAY

Capacity: up to 75 mm (2.9")

QC-S12000 + MT-100L

### HIGH SPEED PRODUCTION - 120 SETS PER MINUTE

Maximum production speed is 120 sets per minute (A4 / 8.5" x 11" LED, Straight Stack, 3 sheets).

Offset Stacking

### 90 % POWER SAVING

When the collator is inactive for a certain period of time, 90 % of the power can be saved compared to the power consumption during operation.

### PRESET STOP

This function is useful for collating a pre-determined number of sets. The collating system stops after a preset number of sets have been collated.

### DOUBLE CYCLE

This feature increases the productivity and operator efficiency with non-stop production and it gives ample time for bin reloading. When any bin in the first section empties, the feeding switches over to the second section and continues collating.
